

Hibiscus

large

Follow the general instruction sheet for placement techniques. When ready to apply the graphics to your surface, use these special tips.

Special Instructions

On a few of the large decal sheets, there are two graphics, one solid and one a frame of the solid shape. To apply individually, you must follow these directions:

Instead of removing the white backing from the entire graphic, when peeling it back, allow the solid graphic to remain stuck to the white backing, while the frame graphics will come off and be adhered to the clear top sheet. This creates two separate graphics that will be applied individually.

First apply the frame graphic to the wall/surface how you choose. Run your applicator firmly over the top sheet/graphic so graphic adheres well to the wall. Remove the top sheet by sliding it straight down the wall and off of the graphic. After you remove the top sheet from the graphic/wall, do not discard it.

Place top sheet back on top of solid graphic that is still on the white backing. Smooth over the top sheet firmly with your applicator tool, so that it adheres firmly again to the solid graphic.

Now remove the white backing from the solid graphic as usual. Apply the graphic to the wall/surface as you choose. Run your applicator firmly over the top sheet/graphic so graphic adheres well to the wall. Remove the top sheet by sliding it straight down the wall and off of the graphic.
